

## Industrial Graphics

For over 70 years Danielson Industrial Graphics produces high quality name and identification plates. This is accomplished by using different base materials, colour combinations and production techniques. In cooperation with the client, Danielson Industrial Graphics creates a design, style and look that will not only enhance your product, but will bring your ideas to life! Its customers, which range from world market leaders to local service industries, all have one thing in common; they all have trust and confidence in Danielson to supply products that consistently exceed their quality requirements. The experienced and proactive service team at Danielson Industrial Graphics would be happy to discuss any requirements that you may have about the realization of your precious image trademark.

## Industrial Graphics Attributes

### Script logos

Script logos are an excellent method of enhancing the style and quality perception of your product. They are available in any shape and colour, are suitable for indoor and outdoor use and have a brilliant 3D effect.

### Dome labels

Dome labels provide an exclusive appearance and feel to your products. They are resilient and robust due to their flexible coating and UV-resistance. Dome labels can be applied on almost any surface. They are suitable in both small and large volume applications.

### alugraphics™

State of the art photorealistic print on aluminium either in matt or gloss finish. Danielson alugraphics™ have the advantage of being scratch, abrasion and chemical resistant. These products are the perfect choice for sales and marketing promotions.

### Front films/Decorative films

Front and decorative films are perfect for enhancing the aesthetic appearance of your products. By using the sub surface full colour printing technique it allows for full flexibility in graphic design options. Available in a wide range of material thicknesses and can be furnished with different embossing features.

### Stickers

Danielson stickers are applicable for a wide range of applications and are available in many base materials and colours. They are available with a variety of adhesives to suit any surface finish. Low cost and perfect for large volume applications.

### Aluminium

Danielson anodized aluminium applications are light weight and extremely durable. It also gives you flexible design features. Together with the processes Danielson employs, the aluminium will assure you of a corrosion free, high quality product that will last a life time.

### Stainless steel

Danielson Industrial Graphics stainless steel is available in any shape and can be used in a wide variety of applications. The added benefits of hardness make the material suitable for durable and very robust solutions.

### Brass/Bronze/Copper

These products, manufactured from prime quality materials, will give your application a superb appearance in a limitless range of designs. Suitable for indoor and outdoor use, these products will certainly bring your ideas to life.

The diversity of the materials, applications and customer objectives allow much more opportunities than stated above. From name plate to State of the Art trademark, from bike to the hightech aviation industry, from industrial to promotional applications, Danielson's Industrial Graphics are applied everywhere to give an exclusive and permanent surplus value to a numerous amount of applications.

With more than 70 years of knowledge and experience, Danielson succeeds to amaze its clients with innovative, effective and cost saving solutions. Have you become interested in the surplus value Danielson can offer your products? Danielson is happy to inform you about this. For samples without our liability or an introduction, you can contact Danielson's commercial team.
